

As part of its strategic plan, The Hut has identified community needs and issues and developed priorities for 2010.

High priority areas:

- Adult community education
- Community information
- Healthy lifestyle activities
- Men's activities
- Community connection for new residents

These are mostly addressed at an individual level:

- Financial stress
- Unemployment
- Mental health
- Carers

We are part of networks in these areas:

- Domestic violence
- Public transport
- Affordable housing

Areas where we help things happen (with others):

- All kinds of support for community groups
- Bushfire safety and awareness
- Art in the community
- Community gardens

These are a fundamental part of how The Hut works:

- We help people be connected to their community
- Volunteering – without it we are nowhere
- We are involved in community networks and collaboration
- We involve communities
- We address the needs of our ageing population
